

ESNEYDER MONSALVE

Full Stack Developer | Backend Specialist Cúcuta, Colombia | esneyder110@gmail.com |
Linkedin: www.linkedin.com/in/esneyder110 | **Languages:** English & Spanish

PROFESSIONAL PROFILE

Innovative Developer with 4 years of expertise in creating scalable and secure applications. Proficient in Node.js, Express.js, and NestJS, with a strong focus on solving complex problems through Serverless and Microservices architectures. Skilled in developing RESTful and GraphQL APIs and optimizing code for high-performance scalability. My background in Electronic Engineering enhances my ability to design and implement efficient, well-structured backend systems.

TECHNICAL SKILLS

- **Languages & Frameworks:** Node.js, TypeScript, NestJS, Express.js, Next.js, React.js, Golang.
- **Backend & APIs:** RESTful APIs, GraphQL, 3rd-party API Integration.
- **Cloud & DevOps:** Azure, Google Cloud Platform (GCP), Firebase, Serverless Architecture, CI/CD Pipelines.
- **Databases:** PostgreSQL, NoSQL, Database Administration.

PROFESSIONAL EXPERIENCE

Backend Developer | LPSysco (Remote)

OCTOBER 2025 – PRESENT

- **Migration** of a critical legacy-to-modern infrastructure, transitioning core services from Ruby to **Go (Golang)** to enhance system concurrency and performance.
- Architecting high-performance backend modules for a major **internet backbone infrastructure project**, focusing on low-latency and high-throughput data processing.
- Implementing **clean code** principles and Go design patterns to ensure the new codebase is maintainable, scalable, and highly efficient.
- Collaborating with cross-functional teams to ensure zero-downtime during the phased migration of critical service components.

Full Stack Developer | Equilibrio Agency (Remote)

FEBRUARY 2024 – OCTOBER 2025

- **Implement a CI/CD pipeline** that reduced deployment time from 15 minutes to 2 minutes.
- Designed and integrated an **AI-driven chat** system using the **OpenAI (ChatGPT) API**, enabling real-time user interaction with PDF documents through advanced natural language processing.
- Automated financial workflows by **integrating local banking APIs** for real-time payment processing and reconciliation, ensuring high data integrity and security.
- **Optimized database queries**, reducing execution time by over 50% and significantly boosting application performance.
- Leveraged **Serverless architecture** to improve system scalability while minimizing operational costs.
- Developed a robust **RESTful API** ensuring seamless integration with external 3rd-party applications.
- Refactored legacy code to enhance reliability, maintainability, and long-term scalability.
- Implemented **Responsive Design** to ensure a consistent user experience across multiple devices.

Backend Developer | Digital Node (Remote)

NOVEMBER 2022 – FEBRUARY 2024

- **Managed an ISP system for 3,000 clients**, overseeing critical payment processing and backend stability.
- Developed **RESTful and GraphQL APIs** to facilitate interoperability between diverse systems.
- Utilized **cloud technologies** to build a highly available and cost-effective backend environment.
- Collaborated with frontend teams in an **Agile-style environment** to ensure smooth system integration.
- Optimized existing codebases to support increased application scalability and performance.

EDUCATION

- **B.S. in Electronic Engineering** | Universidad Nacional Experimental del Táchira
